

Invisible GPS/GSM tracker for containers

Container-Eye, a small, battery-driven tracking device, enables you to keep track of all containers in your fleet. Disguised as an air vent, the tracking device is less likely to be detected and tampered with by a thief.

Monitor your assets in an easy way

Simply place Container-Eye on the container that you wish to protect, and log into your secure online control centre.

You are now ready to monitor your containers and track their position if stolen. With a battery lifespan of up to 9 years, this tracking device is a great investment.

Container-Eye

Keep track

Always know, where your goods are by monitoring on web, smartphone or tablet. Set up email alerts and notifications to receive a warning in the event of an unwanted incident. Easily manage your alarms and functions remotely.

On the move

Activate the built-in motion sensor and Container-Eye will send a position, if your asset is moving. Moreover, activate the notifications to get an alert.

Smart and easy to use

Easy to mount. Simply place Container-Eye on an object, that you wish to monitor and protect - no assembly or wires are required.

Long battery life

Efficient power management ensures a long battery lifespan and makes Container-Eye a great investment.

Invisible – but visible to you

Container-Eye is based on advanced GSM technology, which makes it almost impossible for an intruder to track or jam the device – not even with the use of advanced equipment.

Find your lost container

Track the position of your lost or stolen container in a secure way by using a combination of GPS, GSM and RF technology. As the device is disguised as an air vent, invisible for unauthorized, the recovery rate is extremely high.
