track•eye

Special and small waterproof GNSS tracker with built-in accelerometer and gyroscope.

Track-Eye, a small, smart and waterproof GNSS SPECIAL tracker with Bluetooth connectivity and internal backup battery. Biggest in its class internal High Gain GNSS antenna allows mounting directly on car battery under the hood. Track-Eye is equipped with special clamp connector for fast power cable connection to the car battery.

Compact Two Wire Tracker

Solid waterproof case and built-in accelerometer & gyroscope sensors with extremely accurate crash trace functionality makes this device perfectly suitable for fleet management solutions.

Use cases

- **Light Vehicles**
- **Taxi Companies**
- **Insurance Companies**
- **Courier Services**
- **Rental & Leasing**

Keep up-to-date

Always know, where your assets are by monitoring on web, smartphone or tablet.
Set up email alerts and notifications to receive a warning in the event of an unwanted incident.
Easily manage your alarms and functions remotely.

Real time reporting

Track-Eye uses satellite and celluar communication technologies to send vehicle data directly to the server. Which allows real time monitoring and reporting of your assets.

Immediate alerts

Track-Eye can be configured to send immediate email or SMS alerts when the engine is started, exits a pre-defined area, the battery has been disconnected or even towed (moved with engine started).

Internal backup battery

Track-Eye fits many purposes. The small waterproof tracking device comes equipped with an internal battery, allowing the device to work without an external power source.

Easy to install

Track-Eye simply mounts to the vehicle or assets battery using the provided double-sided tape. It also draws power directly from the battery of the vehicle or asset using the special clamp connectors included.

Crash detection

Track-Eye built-in accelerometer & gyroscope sensors offer extremely accurate crash trace functionality. Perfectly suitable for fleet management companies.
